21. Can trees talk? Yes, but not in words. Scientists have reason to believe that trees do communicate (交际) with each other. Not long ago, researchers learned some surprising things. First a willow tree attacked in the woods by caterpillars (毛虫) changed the chemistry of its leaves and made them taste so terrible that they got tired of the leaves and stopped eating them. Then even more astonishing, the tree sent out a special smell—a signal (信号) causing its neighbors to change the chemistry of their own leaves and make them less tasty. Communication, of course, doesn't need to be in words. We can talk to each other by smiling, raising our shoulders and moving our hands. We know that birds and animals use a whole vocabulary of songs, sounds, and movements. Bees dance their signals, flying in certain patterns that tell other bees where to find nectar (花蜜) for honey. So why shouldn't trees have ways of sending message?

综合题 (20.0 分)

(1) It can be concluded from the passage that caterpillars do not feed on leaves that \_\_\_\_\_.

22. There is no denying that students should learn something about how computers work. For people should have some basic idea of how the things that they use do what they do. Further, students might be helped by a course that considers the computer's impact on society. Computer literacy is not a form of literacy (读写能力); it is a trade skill.

Learning how to use a computer and learning how to program one are two distinct activities. The competent citizens of tomorrow should free themselves from their fear of computers. But this is quite different from saying that all ought to know how to program one. Leave that to people who have chosen programming as a career. While programming can be lots of fun, and while our society needs some people who are experts at it, the same is true of auto repair and violin-making.

Learning how to use a computer is not difficult, and it gets easier as programs become more “user-friendly” . Let us assume that in the future everyone is going to have to know how to use a computer to be a competent citizen. What does the phrase “learning to use a computer” mean? It sounds like “learning to drive a car” , that is, it sounds as if there is some set of definite skills that, once acquired, enable one to use a computer.

In fact, “learning to use a computer” is much more like “learning to play a game” , but learning the rules of one game may not help you play a second game, whose rules may not be the same. There is no such a thing as teaching someone how to use a computer. One can only teach people to use this or that program and generally that is easily accomplished.

综合题 (20.0 分)

(1) To be the competent citizens of tomorrow, people should understand that programming a computer is more essential than repairing a car.

判断题 (4.0 分) (难度:中)

- A. T
- B. F

正确答案: B

23. Climate change has caused a rise in sea levels. This has increased the amount of salt in fresh water used on coastal farms. As a result, farmers are increasingly unable to use fields close to the sea.

Scientists call this process “salinization” which means the mixing of salt and water. Salinization is reducing the world’s irrigated lands by 1 to 2 percent every year.

But a farmer in the Netherlands is now using a mixture of sea and fresh water to grow healthy and tasty vegetables. Marc Van started with an experiment.

“We put in a lot of plants in the fields and then we put them in fresh water and in sea water and all the varieties between them, and then we see which variety is surviving and which variety is dying.”

Mr. Van worked on the project with scientists from the Free University of Amsterdam. He divided a farm into eight areas. Separate pipes pumped fresh and sea water, and a computer program created water with eight levels of salinity.

Computerized measuring devices called “sensors” controlled the water levels and the levels of salinity. Mr. Van says he was able to harvest vegetables from most of the eight test areas. He says the vegetables were smaller than those grown in fresh water. But he says they also have more sugar and salt, so they taste better.

The farmer grew carrots, cabbage and onions. But he found that potatoes grew better than the other vegetables in the combination of sea and fresh water. Mr. Van says four kinds of these potatoes were recently sent to Pakistan, where thousands of hectares of land have been damaged by salinization. Farmers in Pakistan will test these potatoes to see if they can be grown in those fields.

综合题 (20.0 分)

(1) What is preventing farmers from making full use of coastal fields?

单选题 (4.0 分) (难易度:中)

A. Salinization.

B. Saline.

C. Irrigation.
